

## Comparison Chart of Stairlift Features

| Feature  | Rave2                | Legacy II      |
|--|----------------------|----------------|
| • Made in USA  | Y                    | Y              |
| • Mounts onto the steps                                | Y                    | Y              |
| • 350 LB. transport capacity                           | Y                    | Y              |
| • Over Speed Governor (OSG)                            | Y                    | Y              |
| • Two remote wireless call/send transmitters           | Y                    | Y              |
| • Seat swivels & locks at the top of the stairs        | Y                    | Y              |
| • Optional key lock                                    | Y                    | Y              |
| • Battery powered                                      | Y                    | Y              |
| • Trips during power outages                           | 60                   | 20             |
| • Folding rail option for door/hallway at stair bottom | Y                    | N              |
| • Retractable seat belts                               | Y                    | N              |
| • Seat width   | 19.5"                | 18"            |
| • Distance out from track-side wall when folded        | 11"                  | 12.5"          |
| • Travel obstruction sensors <sup>1</sup>              | Y                    | N <sup>1</sup> |
| • Maintenance-free <sup>2</sup>                        | Y                    | N <sup>2</sup> |
| • Quiet & smooth ride <sup>2</sup>                     | Y                    | N <sup>2</sup> |
| • Choice of four seat colors                           | Beige                | Y              |
| • Warranty - carriage                                  | 2 yrs. <sup>3</sup>  | Lifetime       |
| • Warranty - <b>all</b> other parts (except batteries) | 2 yrs. <sup>3</sup>  | Lifetime       |
| • Warranty - batteries                                 | 30 days <sup>3</sup> | 2 yrs.         |

Differences noticed in gray

<sup>1</sup> The Legacy obstruction sensors for downward trips only while the Rave2 senses in both directions.

<sup>2</sup> The Rave's polymer screw drive is maintenance-free and provides a more smoother & quieter ride. The Legacy uses the industry's standard steel rack & pinion drive. Steel rack & pinion drives require periodic cleaning & lubrication and deliver a slightly bumpier & noisier ride.

<sup>3</sup> The Rave2 Warranties were reduced from 5-3-1 in Spring of 2024 to avoid price increase from Harmar
